

*A manifesto for anyone who was ever told
their dreams were too big.*

ABOUT THE AUTHOR

Aaryan Saroha is an entrepreneur and an Electrical Engineering undergraduate at **IIT Jammu**. He believes the world has never been changed by people who thought small.

His philosophy is simple: the people who are remembered were often called *delusional* before they were called successful.

Through this book, Aaryan challenges readers to think bigger, believe before there's proof, and build a life too extraordinary to be ignored.

Because sometimes, being a little delusional is exactly what reality needs.

A MANIFESTO FOR THE DOUBTED

DELUSIONAL

The Blueprint for Impossible Dreams

How to Build an Unshakable Mindset in a World That
Expects You to Stay Small
